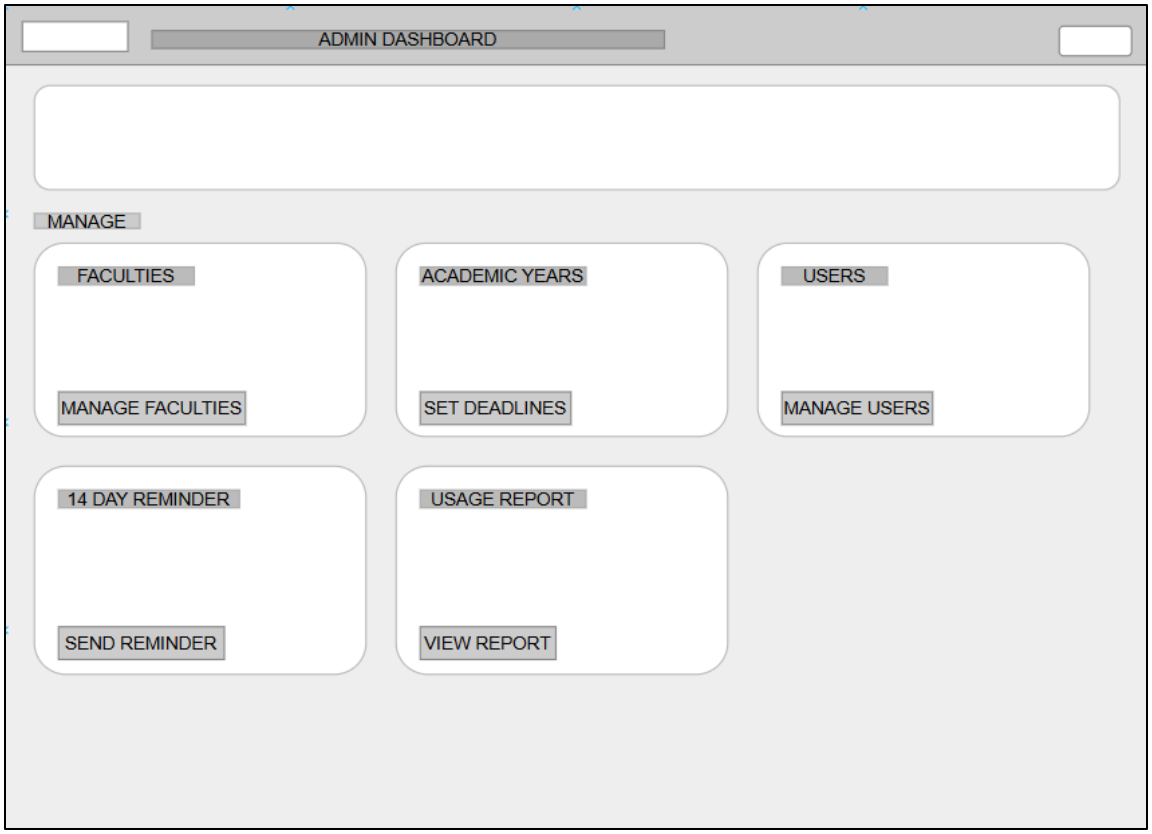
Wireframes

Sprint 1

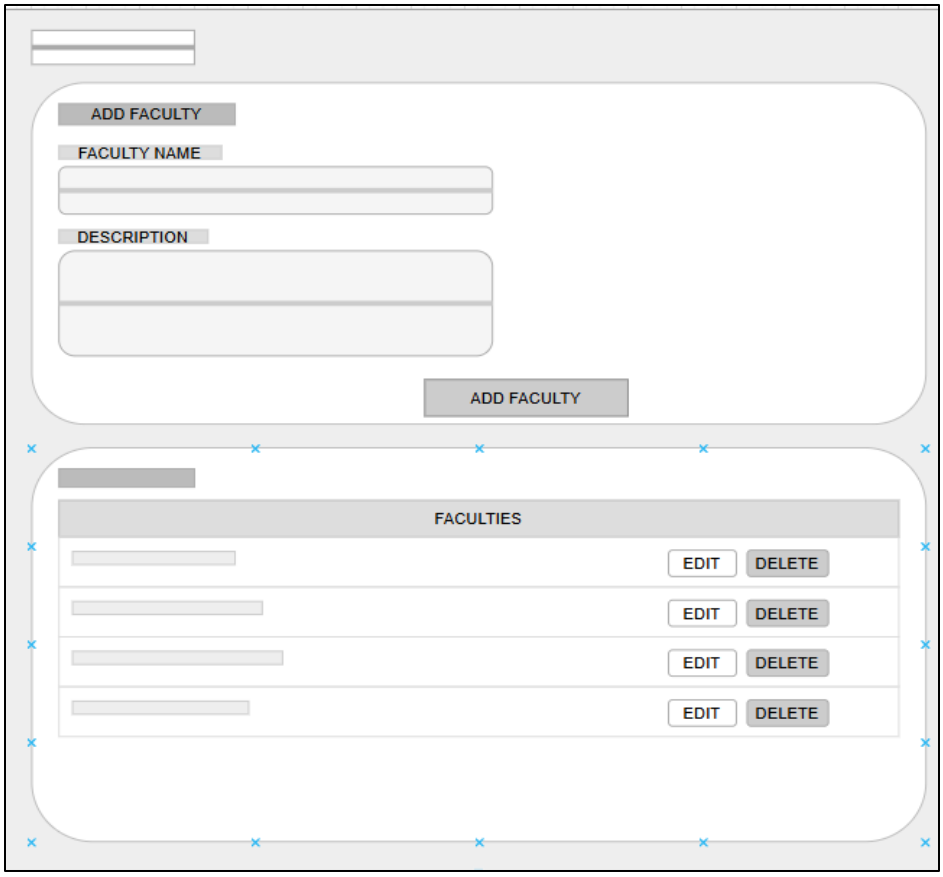
Create account page

The above image is a wireframe of the system's create account page where users are asked to enter their details and create an account in the system.



Admin dashboard

The above wireframe is the admin's dashboard which allows them to manage faculties, deadlines, users, closure date, and view stats of the system.



Manage faculty page (admin side)

The above wireframe is the managed faculty page in the admin side, allowing them to add, edit, and delete a faculty in the system.

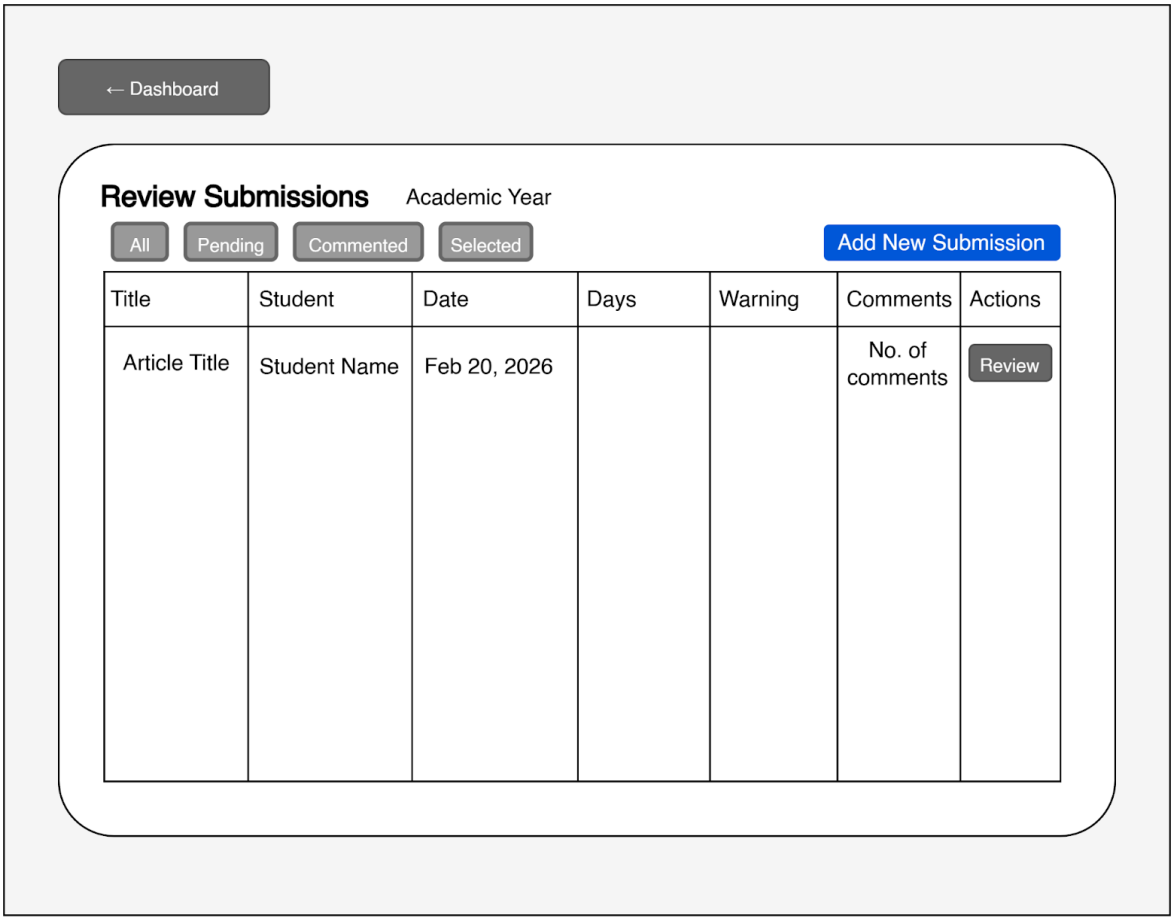
Manage academic page (admin side)

The above image is the manage academic year page in admin side, allowing them to insert a name, enforcing the closure dates, and implementing them in the system.

Sprint 2

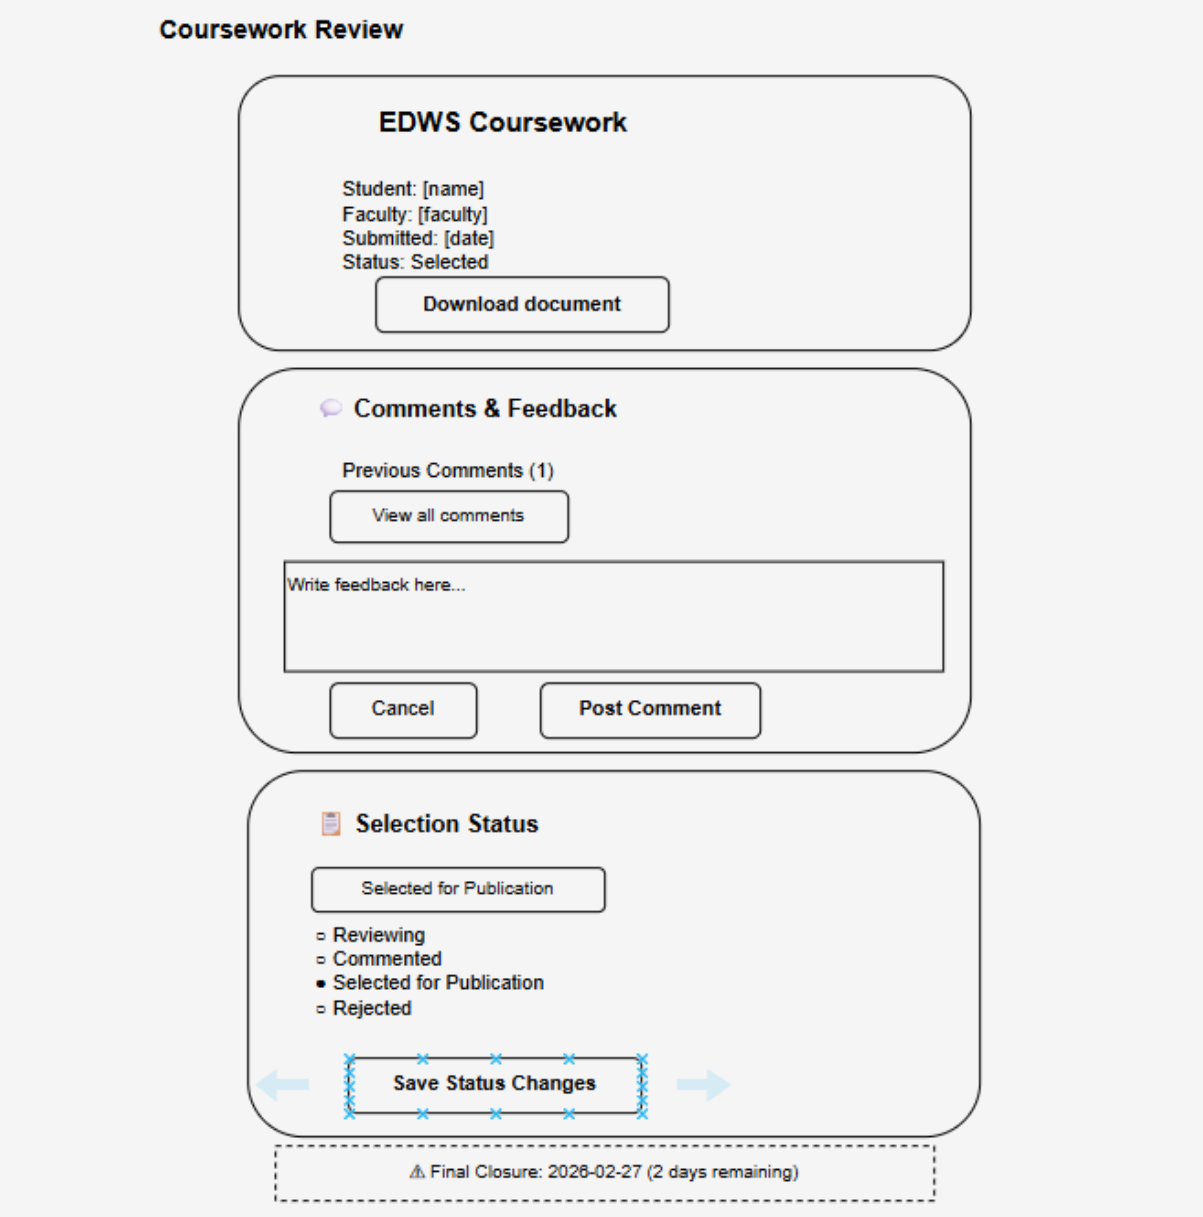
Submit article page (student side)

The above wireframe shows the submit article page on the student side, allowing them to enter article details and submit them as they insert the article and image if they want to.



Review submissions page (student side)

The above wireframe shows the review submission page on the student side, which allows them to view if their submission has been selected/reviewed/rejected.



Submission review page (coordinator side)

The above wire frame is the submission review page in the coordinator side, which allows them to download and review student's contributions, comment/send feedback to them, and select their submission status.

Submission review page (students side)

The above wire frame is the students review page for their submissions. It shows if their submission has been selected or not and allows them to view comments from the coordinator.
